EDUCATION:

Bachelor of Technology (B.Tech.) - Computer Science *Sep 2022 - June 2026*
Vellore Institute of Technology (B.TECH CSE)
Cumulative GPA - 7.48

SKILLS:

- **Sales & Business Development**: Consultative Selling, Technical Pitching, Lead Generation, Stakeholder Management, Relationship Building, Market Research.
- **Technical Sales Engineering**: Solutions Architecture, Requirement Gathering, Product Demonstrations, ROI Analysis, Technical Documentation, Competitive Intelligence.
- **Data & Analytics**: Data-Driven Storytelling, Performance Metrics, Data Visualization (Matplotlib), SQL, Predictive Modeling.
- **Communication & Leadership:** Public Speaking, Cross-functional Collaboration, Strategic Planning, Conflict Resolution, Event Coordination.

PROJECTS:

- **CivicHelp AI** *Dec 2025 – Feb 2026*
  - Conceptualized the project workflow a multimodal GenAI pipeline and coordinating tasks to automate civic grievance redressal ensuring smooth integration and delivery.
  - Managed the full development lifecycle from data ingestion (10K+ records) to deployment, prioritizing features based on municipal urgency and impact.
  - Implemented RAG-based policy grounding to translate civic complaint requirements into technical specifications reducing misinformation risk and improving action recommendation reliability by 30%.
  - Monitored performance metrics, predicted rising civic trends and urgency via integrated detection tools and documented the improvements, streamlining analysis and improving response efficiency by 35%.
  - Tech Stack: Python, Generative AI, RAG, Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib.

- **Heart disease detection** *May 2025- Sept 2025*
  - Developed a predictive analytics system for early detection of heart disease by training a dataset of patient's physical and medical characteristics.
  - Improved decision-making using data and optimized various machine learning algorithms while identifying bugs to enhance prediction accuracy and efficiency.
  - Attained a prediction accuracy of more than 85% by analyzing 1000+ dataset entries and built visual reports and performance dashboards to communicate insights enabling structured analysis.
  - Skills Used: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Machine Learning.

- **Desktop Assistant** *Nov 2024- Feb 2025*
  - Planned and executed workflow automation system to handle routine operational tasks and manage task prioritization resulting in reduced manual effort by 20% and improved task execution speed.
  - Designed modular workflows to integrate sub-second voice-to-text conversion showcasing feature implementation and a GUI (Tkinter) for task execution features demonstrating hands-on experience in automation, process streamlining, and user-centric design.
  - Skills used: Automation, OpenCV, PyTorch, Tkinter Python libraries (SpeechRecognition, pyttsx3)

CO-CURRICULARS:

- Member, AI Club, VIT Bhopal 2022 – Coordinated events and collaborated with cross-functional teams for smooth execution, assisted in documenting project workflows, handled planning and on-ground operations from resource allocation to budgeting, improved engagement through efficient communication and teamwork, enhancing student participation in Artificial Intelligence initiatives.
