Summary :

Final-year Computer Science student with strong skills in project coordination, requirement analysis, and stakeholder communication. Detail-oriented with strong communication, problem-solving, and analytical skills. Adept at understanding user needs, building solutions, and driving outcomes through structured thinking. Eager to contribute to AI product development while learning and applying Agile methodologies.

Education :

Vellore Institute of Technology Expected June 2026
Bachelor of Technology in Computer Science & Engineering (CGPA: 7.48 / 10.0)

Skills :

- **Product & PM :** Feature Prioritization, Requirement Analysis, User Stories, PRD Writing, Product Roadmap, KPI Tracking, Competitive Analysis, A/B Testing Basics, Scope Management, Scheduling, Risk Management, Requirement Gathering, Milestone Tracking, Go-to-Market Basics.
- **Technical**: Python, SQL, Data visualization (seaborn, matplotlib), Data analysis (scikit, NumPy, Pandas)
- **Tools:** Microsoft Office Excel (Pivot Tables, VLOOKUP, Data Modeling), PowerPoint, Word, Google Sheets, Google Slides, Github, Figma (Basics), Jira, Trello, Tableau, PowerBI.

Projects :

CivicHelp AI *Dec 2025 – Feb 2026*

- Conceptualized the project workflow a multimodal GenAI pipeline and coordinating tasks to automate civic grievance redressal ensuring smooth integration and delivery.
- Managed the full development lifecycle from data ingestion (10K+ records) to deployment, prioritizing features based on municipal urgency and impact.
- Implemented policy grounding to translate civic complaint requirements into technical specifications reducing misinformation risk and improving action recommendation reliability by 30%.
- Monitored performance metrics, predicted rising civic trends and urgency via integrated detection tools and documented the improvements, streamlining analysis and improving response efficiency by 35%.

iMovies *Nov 2024- Feb 2025*

- Engineered a full-stack movie ticket booking system supporting secure login, dynamic showtime selection, and interactive seat mapping for seamless user flow.
- Reduced transaction errors by 40% by implementing real-time availability checks, showcasing an ability to maintain platform integrity and partner trust.
- Designed responsive UI for browsing and booking, enhancing user satisfaction and engagement by 30%.
- Managed systems supporting 1,000+ concurrent users, focusing on reliability and seamless service delivery and customer experience.

Co-curriculars :

- **Member, AI Club** | VIT Bhopal 2022 – Present
  - Coordinated events and collaborated with cross-functional teams for smooth execution by handling planning and on-ground operations from resource allocation to budgeting, improved engagement through efficient communication and teamwork.
  - Analyzed project performance metrics using Excel/Google Sheets to derive insights and improve results and maintained organized documentation of project workflows, datasets, and model progress for team alignment.
